

SUMITOMO BRASS

Sumitomo Premium Brass EDM Wire is manufactured exclusively for Single Source Technologies. Sumitomo is known world-wide as a leading producer of the highest quality products. Sumitomo wire is made only from virgin raw materials (no scrap content) and is a paraffin-free product. Sumitomo EDM wire manufacturing facilities have been registered as meeting the requirements of ISO 9001. These wires have been developed in close collaboration with well renowned Japanese WEDM machine manufacturers to provide optimum machine performance.

Straightness

Strength

Cleanliness

Performance

Cut Quality

Cost

Straightness

A key factor in the reliability of automatic threading. Critical for older machines, not as critical for newer machines with wire annealing capabilities. Straightness is tested at both one meter and 300mm utilizing a custom designed fixture.

Strength

Primarily a measure of the wire tensile strength. However, in the case of Compeed wire, the ability to resist breakage under extreme conditions.

Cleanliness

A combined rating with respect to powder and residual lubricant or paraffin on the surface of the wire. This property is tested in a custom designed cleanliness testing machine as well as passing the wire through an actual pre-guide, power feed and guide assembly which mimics actual machine conditions.

Performance

The cutting speed potential relative to brass wire. Machine settings optimization may be required to attain the performance potential.

Cut Quality

The measured surface finish Ra and Rz resulting from an actual rough and multiple skim test cut.

Cost

Relative to standard brass wire
